We've been doing all this around St Louis since (YearEstablished).

After all, (CompanyName) is not your average comic, song, dance, juggling, puppet, magic and balancing act show. No siree. We've performed for audiences as far away as Glasgow, Scotland and appeared on network television.

We've won quite a few local awards, too.

Is your history or background an important selling tool?

Background

Entertainment is in our blood. Literally.

- Art Simon and Doug Zimmer grew up in show-business families.
- Pauline Aaron and Lou Schmidt started performing in public before they even knew there was a difference between applause and applause.
- Sandra Dorobas entertainment career began in junior high school.

Between us, we have four degrees in music, two graduate diplomas in drama and a certificate of proficiency in scuba diving (don't ask).

We're all full-time, professional entertainers with one mission in mind: to show your party-goers or companys guests the time of their lives.

## Definer Edit Session

```

The flowchart illustrates the logic for invoking DXC interfaces. It starts with three entry points (circles) on the left. The first entry point leads to a decision diamond: "Does the DXC have an Edit interface?". If "Yes", it leads to a process rectangle: "Invoke Edit Interface". If "No", it leads to a second decision diamond: "Does the DXC have a Preview Interface?". The second entry point leads to this second diamond. If "Yes", it leads to a process rectangle: "Invoke Preview Interface". If "No", it leads to a third process rectangle: "Invoke Runtime Interface". The third entry point also leads to this "Invoke Runtime Interface" rectangle.
